Dear Mr. Ashcroft, would you please put a stop to law suits against Microsoft. It is a put down to capitalism and for anyone to be inventive and hard work. The government shouldn't go around suing anyone. That's not the purpose of government. This country has become nothing but one big law suit. I do not pay taxes to the federal government or state government to use my money to sue people. Thank you. Crack down harder on illegal immigrants. Deport them and get them out of here. How about a 2 yrs. moratorium on foreign visitors and students. This country will do well without them. Judith Tom
